FIELD TO PINT & FIELD TO SPIRIT

We are a craft malting company located in Menoken, ND. We specialize in growing our own quality grain, and turn it into small batch craft malt. Our malt is traceable down to the field where it was grown. We call this Field to Pint and Field to Spirit.

Two Track Malting has developed our own grain varieties for the craft market. Brewski is a two row barley featuring great efficiency, faster lautering, and a nice plump kernel. Astro is a white wheat variety developed specifically for the brewing industry. We are the only ones in the world growing and malting these varieties and continue to develop new varieties.

When you work with Two Track Malting, you are getting products directly from our multi-generational family farms. We practice soil-building, regenerative agriculture, pulling carbon from the atmosphere and putting it back into the soil.

- Product packaged in 50 lbs bags
- Pallets up to 2,250 lbs
- Orders can be mixed and matched
- No minimums
- Milling available starting at \$0.05/lb

- Bulk available upon request
